

**Key features and benefits of IBSA include:**

Quickly locate patients, staff, and high value assets

Improve patient care and safety

Provide metrics for improved quality of patient care and efficiency of operations

Track preventive maintenance, cleaning, and equipment availability

Optimize asset and resource management

Improve workflow and process efficiency

Accurately charge for asset utilization and services

Monitor critical environmental and best-practice compliance

Manage bed-turn more efficiently

Automate data capture and record keeping

**Better Patient Care:** By improving overall workflow, IBSA helps reduce patient wait times and ensure patients are seen. Free your staff's time to be where they are needed most.

**Improved Safety:** Tracking systems positively locate and identify every patient and staff member on site at all times. Automatic alerts notify staff when patients and visitors move in and out of security zones.

**Asset Management:** Schedule equipment maintenance based on actual frequency and duration of use. Ensure compliance with regulations, keep equipment clean and calibrated, and track and schedule routine inspections.

**High Value Asset Location:** Spend less time searching for critical-care assets. Make sure these valuable pieces are where they need to be, when needed.

**Reduced Costs:** IBSA can provide the metrics you need for planning and decision-making. Reduce equipment rental/lease expenses and unnecessary capital expenditures. Avoid over-purchasing by distributing assets based on utilization metrics.

**For all inquiries and/or to schedule your site survey please contact:**
